

For Teachers: Please have the students read the sentences one at a time and correct their pronunciation of each sentence then have them repeat after you. Wait until after they read the sentence (use the number in place of the missing word) to have the students choose the correct answer to fill in the blank. When the students finish the article, move on to the further questions.

3[A] – Lights Out

10.2(3A)A2E

- When we hear the word "pollution," we generally think of the damage to the environment caused by chemicals and other substances.
- Recently, however, another type of pollution has begun to attract attention —light pollution. This refers to any negative effect of artificial light on the environment. According to experts, artificial light is doing damage both to (26) and to human beings.
- *Choose the correct answer to fill in the blank from these choices.
- (26) 1 leisure 2 industry 3 nature 4 culture

Further Questions&A*Ask student to answer the question on their own at first. If the student can't answer correctly, have him look at the last page and read the "example answer" for the question. Have the student try to memorize the answer, if it's too long or difficult, you should divide the sentence into 2 or 3 parts to make it easier to remember. Once they have memorized the answer, the teacher should ask the question one last time so that the student can practice answering. Also if you find any mistakes, please mark the page and let me know ASAP.

- 1)-26 What is pollution? 汚染とはなんですか。
- Pollution is something made by humans that does damage to the environment.
- 2)-26 What is light pollution? 光害とはなんですか。
- Any negative effect of artificial light on the environment.
- The first people to become aware of light pollution were scientists who study the stars.
- They noticed that it was becoming more and more difficult to see stars at night because of all the light given off by cities. Light pollution, though, does not only make it harder for us to see the stars.
- It also harms our health by interrupting sleep and sometimes even interfering with the body's ability to produce the chemicals needed to stay healthy. It also affects wildlife, causing animals to become (27).
- For example, artificial lights can make it difficult for baby turtles to find the ocean after they are born, and as a result, many of them die.
- Choose the correct answer to fill in the blank from these choices.

14. (27) 1 confused 2 lonely 3 peaceful 4 independent

Further Questions&A

15. 3)-27 What did scientists who study the stars first notice about light pollution?

16. 星を研究している人たちが最初に気が付いた光害はなんでしたか。

17. They noticed that it was becoming more and more difficult to see stars at night (because of the light given off by cities).
