

TOEFL Speaking 26: Question 6

Listen-> **Lecture** -> 1 ½ to 2 ½ minutes

?

Preparation time: 20 seconds

Response time: 60 seconds

Lecture -> Think of it as a 3 paragraph essay

Topic – definition

(a)

About 30 seconds

Subtopic 1 – definition

(b)

Example

(c)

About 40-45 seconds

Subtopic 2 – definition

(d)

Example

(e)

English Teachers On Call

YOUR NOTE:

Thermoregulation
Fat whales
Evaporative cooling rodents

Question:

What was the lecture about? What did the lecture describe?

Powerful Phrases:

In this lecture, the professor talks about thermoregulation. He describes two ways that animals control their internal temperature. The first way is through fat. The professor gives an example to illustrate this about whales. The second kind of way that an animal controls its internal temperature is through evaporative cooling. The professor gives an example to illustrate this about rodents.
