

## Eiken Dual-RSP G2

### Reading & Speaking Practice Lesson #20

#### Story

#### **QR Codes: Unlocking Information at Your Fingertips**

Have you ever seen those funny-looking square codes on posters or packages? Those are called QR codes! QR codes are like magic doors to more information!

QR codes work with smartphones and special applications. When you scan a QR code using your phone, it opens a secret portal to a website or a page with more details.

They are great because they save time! Instead of typing long web addresses, just scan the QR code, and you're there!

QR codes can tell us all sorts of things. They can show yummy recipes, tell exciting stories, or give us fun facts about animals and places.

This document is for use in eTOC training sessions, use outside of eTOC is strictly prohibited.

Businesses use QR codes too. You might find them on food packages to learn about the ingredients, or on ads to watch a cool video.

Next time you see a QR code, give it a try! Scan it with your phone, and you'll discover a world of information waiting for you! It's like having a secret treasure map in your pocket!
