

Implementing Business Intelligence Tools

Part 1: Office Roleplay Dialogue

Scenario: An Intelligence Analyst, Ayaka, is discussing **system implementation** of new **BI tools** with her colleague, Omar. They are working together on **tool integration** and **user training** across the organization.

Omar: Hey Ayaka, how's the **system implementation** of the new **BI tools** going?

Ayaka: It's progressing well, but we're still working on **tool integration** with our existing databases.

Omar: That makes sense. Have you planned any **user training** sessions for the staff?

Ayaka: Yes, we're scheduling workshops to ensure everyone understands the new **BI tools** and their features.

Omar: Great! And how's the **software deployment** phase coming along?

Ayaka: We've rolled out the initial version, but we need to fine-tune the settings before full deployment.

Omar: Understood. Are there any major challenges with adoption so far?

Ayaka: Some employees find the new system overwhelming, so we're simplifying the training materials.

Omar: That's a good approach. A smoother transition will increase adoption rates.

Ayaka: Exactly! Once we improve the training, the organization will benefit from better data insights.

Omar: Let's review the feedback after the first round of training and adjust as needed.

Part 2: Comprehension Questions

1. What are Ayaka and Omar discussing?

- (A) Organizing a company event
- (B) Hiring new employees
- (C) Implementing BI tools
- (D) Changing office furniture

2. What challenge does Ayaka mention about the new system?

- (A) Employees find it overwhelming
- (B) The office computers are too old
- (C) Customers don't like the new website
- (D) The software has too many advertisements

3. What step is Ayaka currently working on?

- (A) Designing a new company logo
- (B) Managing social media accounts
- (C) Planning a holiday party
- (D) Tool integration

4. How does Ayaka plan to help employees adapt to the new system?

- (A) Hiring more IT staff
 - (B) Simplifying training materials
 - (C) Canceling the system implementation
 - (D) Removing key features from the software
-

Part 3: Key Vocabulary Definitions in Japanese
