

# Monitoring Construction Progress as an Interior Architect

## Part 1: Roleplay Dialogue

**Scenario:** An Interior Architect is conducting site visits to monitor construction progress and ensure design implementation with a colleague.

### Characters:

- **Hiroshi** – Interior Architect
  - **Maria** – Project Coordinator
- 

**Hiroshi:** Good morning, Maria. I'm here for the **site supervision** visit. How's the progress on the ceiling installation?

**Maria:** Morning, Hiroshi! The workers have started, but we need to do a **material verification** first. There were some concerns about the batch we received.

**Hiroshi:** Understood. Let's check the texture and color against the original samples. We can't compromise on **installation quality check**, especially for the high-traffic areas.

**Maria:** I agree. Also, the flooring in the lobby is almost done. Could you review the **punch list** items and confirm if they align with the specifications?

**Hiroshi:** Sure. I'll walk through each section and ensure every detail is up to standard. Have you updated the **project timeline assessment** after yesterday's delay?

**Maria:** Yes, I adjusted it to reflect the minor setbacks. We'll need to push back the final inspection by two days.

**Hiroshi:** That's reasonable. Let's keep an eye on the contractor's workflow to avoid further delays. I'll take some photos for documentation.

**Maria:** Good idea. We'll also send a progress report to the client. If any issues arise, we should address them before the next phase starts.

**Hiroshi:** Agreed. Let's finish the review and ensure everything aligns with the original plan.

**Maria:** Perfect. I'll take notes while you complete the walkthrough.

---

## Part 2: Comprehension Questions

1. What concern does Maria mention about the ceiling installation?
    - A) The workers are behind schedule.
    - B) The design does not match the blueprint.
    - C) The ceiling panels are missing.
    - D) The material needs to be verified.
  2. Why does Hiroshi take photos during the site visit?
    - A) To post them online.
    - B) For project documentation.
    - C) To share with the workers.
    - D) For future advertising.
  3. What is Maria's concern regarding the punch list?
    - A) It has not been updated.
    - B) Some items do not meet specifications.
    - C) The client has rejected it.
    - D) It was not reviewed by Hiroshi.
  4. How does Maria plan to handle the project delay?
    - A) By hiring more workers.
    - B) By ignoring the setbacks.
    - C) By adjusting the project timeline.
    - D) By reducing the quality of materials.
-

### Part 3: Vocabulary Definitions (Japanese Translations)

1. **Site supervision (現場監督)** – Overseeing construction activities to ensure design compliance.
  2. **Punch list review (手直しリスト確認)** – Checking items that need fixing before project completion.
  3. **Material verification (材料確認)** – Ensuring materials meet project specifications.
  4. **Installation quality check (施工品質検査)** – Reviewing if installations meet required standards.
  5. **Project timeline assessment (プロジェクトスケジュール評価)** – Evaluating progress to ensure timely completion.
- 

### Part 4: Answer Key

1. **What concern does Maria mention about the ceiling installation?**  
 **D) The material needs to be verified.**
2. **Why does Hiroshi take photos during the site visit?**  
 **B) For project documentation.**
3. **What is Maria's concern regarding the punch list?**  
 **B) Some items do not meet specifications.**
4. **How does Maria plan to handle the project delay?**  
 **C) By adjusting the project timeline.**
