

Presenting Landscape Design Proposals to Clients and Review Boards

Part 1: Dialogue

Liam (Landscape Architect): We have a big **public presentation** tomorrow for the city council. Have you finalized the slides?

Sophia (Colleague): Almost. I included all key visuals, but I think we should emphasize our **community engagement** strategy more.

Liam: Good point. Residents want to see how the design benefits them. We should highlight their input in the **design narrative**.

Sophia: Agreed. I also added a section on our **3D landscape rendering** to give them a realistic preview of the final project.

Liam: That's great. Visuals are powerful. The next step is making sure we clearly explain the **approval process** so everyone understands the steps.

Sophia: Right. The city officials will want details on permits and zoning laws before giving final approval.

Liam: Exactly. That's why we need to be prepared for questions. Do we have enough supporting data for potential objections?

Sophia: Yes, we have environmental impact assessments and traffic flow studies ready. Those should strengthen our case.

Liam: Perfect. Let's also make sure we rehearse our key points before the meeting. Clarity and confidence will help win support.

Sophia: I agree. A well-structured presentation will keep the audience engaged and increase our chances of getting approval.

Part 2: Comprehension Questions

1. What is the purpose of **public presentation** in the project?
 - (A) To advertise new design software
 - (B) To showcase the project to the public and stakeholders
 - (C) To sell landscape materials
 - (D) To train employees on new techniques
 2. Why is **community engagement** important in landscape projects?
 - (A) It reduces the cost of construction
 - (B) It speeds up the approval process
 - (C) It eliminates the need for government approval
 - (D) It ensures that the design reflects local needs and concerns
 3. What role does **3D landscape rendering** play in presentations?
 - (A) It helps clients visualize the final project
 - (B) It increases project costs significantly
 - (C) It replaces all written documents
 - (D) It is only useful for private projects
 4. Why is it important to explain the **approval process** clearly?
 - (A) To impress the review board
 - (B) To gain necessary permits and permissions
 - (C) To avoid public engagement
 - (D) To reduce construction expenses
-

Part 3: Vocabulary with Definitions

- **Public presentation (公開プレゼンテーション)** – A formal event where project designs are showcased to an audience.
- **Community engagement (地域参画)** – Involving residents and stakeholders in the planning process to ensure their needs are met.
- **Approval process (承認プロセス)** – The series of steps required to gain official permission for a project.

- **3D landscape rendering (3D ランドスケープレンダリング)** – A digital visualization of a landscape design to help clients and officials understand the project.
 - **Design narrative (デザインナラティブ)** – The story and reasoning behind a design, explaining how it meets functional and aesthetic goals.
-

Part 4: Answer Key

1. **What is the purpose of public presentation in the project?**
☒ (B) To showcase the project to the public and stakeholders
2. **Why is community engagement important in landscape projects?**
☒ (D) It ensures that the design reflects local needs and concerns
3. **What role does 3D landscape rendering play in presentations?**
☒ (A) It helps clients visualize the final project
4. **Why is it important to explain the approval process clearly?**
☒ (B) To gain necessary permits and permissions
